

**AMENDMENT IN THE CLAIMS**

Please enter the following amendments to the claims without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents as follows:

Please cancel claims 4-12 and 14-27 without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents.

1-27. (Cancelled)

28. (Currently Amended) An isolated DNA molecule that comprises a base sequence selected from the group consisting of

(a) SEQ ID NO: 1, SEQ ID NO:3, ~~or and~~ and/or SEQ ID NO: 5, ~~or and~~

(b) ~~a complementary sequence thereto, or~~

(c) a variant sequence ~~comprising part or all~~ consisting essentially of either of the sequences recited in ~~parts~~ part (a) ~~and~~ (b), wherein the variant sequence hybridizes with the sequences recited in ~~parts~~ part (a) ~~and~~ (b) under stringent conditions, or hybridizes with a probe consisting of nucleotide positions 1289-1453 of SEQ ID NO: 1 under stringent conditions, and wherein the variant sequence encodes a protein that binds to Filamin 1 and inhibits cell migration.

29. (Currently Amended) An isolated DNA molecule that encodes a protein, wherein the protein:

(a) comprises an [[amino-acid]] amino acid sequence selected from the group consisting of SEQ ID NO: 2, SEQ ID NO: 4, and SEQ ID NO: 6; or,

(b) comprises an amino-acid sequence encoded by a DNA molecule according to claim 28, wherein the protein binds to Filamin 1 and inhibits cell migration.

30. (Previously Presented) An isolated DNA molecule according to claim 28 wherein the stringent hybridization conditions comprise hybridization at 65°C in a buffer containing 0.1x SSC.

31. (Currently Amended) ~~A~~ An isolated host cell that comprises ~~an~~ expression system which expresses the protein according to claim 29.
